DETAILED ACTION

Restrictions, Three Groupings

1. Restriction to one of the following inventions is required under 35 U.S. 121:

I. Claims 1-7, 18-19, drawn to a foam construction block, classified in class 52, subclass 426.

II. Claims 8-15, drawn to a portable mold for making a foam construction block, classified in class 249, subclass 136.

III. Claims 16-23, drawn to method of making a foam construction block, classified in class 264, subclass 41.

2. Inventions I, II, and III are related as process of making and product made. The inventions are distinct if either of the following can be shown:

(1) that the process as claimed can be used to make other and materially different product or

(2) that the product as claimed can be made by another and materially different process.

For instant case, the apparatus claims, group I of foam construction block could be made by a method different than group II by having a metal rectangular frame set on construction site and pour bonding material to foam within the frame.

And group III, a method of making a wall could be made by using other foaming insulation material install to wall and have wall panels attaching outside wall and then coating by paint.

Art Unit: 3635

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. During a telephone conversation on 9/12/01 to request an oral election to the above restriction requirement, but did not result in an election being made.
